# Phishing

Il phishing è un tipo di truffa effettuata su Internet attraverso la quale un malintenzionato cerca di ingannare la vittima convincendola a fornire informazioni personali, dati finanziari o codici di accesso, fingendosi un ente affidabile in una comunicazione digitale.

Si tratta di una attività illegale che sfrutta una tecnica di ingegneria sociale.

# Tecniche per evitare BlackList

È fondamentale per un Phisher ritardare l'inserimento del sito clone nelle principali BlackList. La vittima non vedrà alcun messaggio di allerta e cadrà facilmente nella truffa.
